Vision – Innovate to protect

DESAPRO is a international industry leader in specialized premium rack mounts, transit and equipment cases. We provide our customers with innovative solutions to safeguard and protect valuable and precious goods during transport or operation worldwide.

- We have an international foot print
- We cater to different industries
- We manufacture high quality and reliable products

2. Engineering Center

3. Manufacturing Excellence

Aluminum Fabrication capabilities:
Shearing, punching, bending, welding

30,000 SF of manufacturing capacity

Skilled workforce through DESAPRO
manufacturing internal apprenticeship

Supply chain: Strategic partnerships
with local manufacturers

ISO 9001:2015: inline and final quality
inspection verification

DESAPRO House
Customized Cases

**MILEX
19" inch
Rackmount
Cases**

**KOOLEX
Cooling
Solutions**

**STANEX &
AEGIS
Transport Cases**

**PORTEX
Equipment
Cases**

We offer four types of MILEX 19" Transit cases

- **Shock Mounted** is intended for use in extreme conditions. The electronics are attached to a shock mounted chassis, not directly to the shell.
- **Hard Mounted** is intended for applications where vibration protection is not critical. It is a standard 19 inch case without a shock mounted chassis.
- **Wire Rope** case with the chassis mounted on stainless steel spiral wound wire rope shock absorbers. These types of shock absorbers are used where electronics have to be protected from vibration and particularly severe shock.
- **MILEXPRO** is the newest generation of robust transit cases. It combines the high value by shortening the integration time of your hardware and easy access during transport and/or in operations.

- Chassis custom fitted to meet your specifications
- Rubber or wire rope isolators based on application and payload requirements
- Custom drawers or slides are available
- Finish to customer specification – Chemflaming per Mil-spec Type I or II and/or anodizing

Sizes and finish
Custom sizes and
colors available

Custom design Foam
We offer custom foam
inserts in a variety of
different materials

Features

- Light weight Aluminum
- Stackability
- Reinforce corners
- Heavy duty latches
- Spring-loaded handles
- Reinforced ribs for stability

4. Products: Portex

- Instrument cases that are designed for the most demanding protection of sensitive equipment.
- Produced to fit any customer package needs
- Meets MIL-STD 810 Environmental Protection
