TANK AMMUNITION

120 mm and 125 mm

120 mm ammunition for RH 120 L44 tank gun:

- APFSDS-T (Armour Piercing Fin Stabilized Discarding Sabot Tracer) ammunition is designed to destroy armored targets.
- APFSDS-T-TP (Armour Piercing Fin Stabilized Discarding Sabot Tracer Target Practice) is designed for effective training of Leopard 2A4 tank crews in firing to targets at 2500 m.
- The 120 mm HE (High Explosive) rounds are intended for combat firing from the Leopard 2A4 tank gun.
- The HE-TP (High Explosive Training Practice) rounds are designed for the training of crew on the Leopard 2A4 tanks in firing to ground targets.

125 mm ammunition for 2A46 tank gun:

- HE rounds are designed for firing from 125 mm 2A46 smooth-bore tank gun provided with separate loading system.
- The Gun-Fire Imitator round is designed for firing from 125 mm 2A46 smooth-bore tank gun provided with separate loading system. It imitates the flash-and-thunder effect such as with live ammunition. The rounds are used for the training of soldiers on training grounds and in garrisons.
